

Maximize your take-home income with a Flexible Spending Account

Your flexible spending account (FSA) is a special account that allows you to set aside money from your paycheck before taxes to pay for qualified medical expenses. This means you can reduce your taxable income by the amount you contribute to your FSA, which can result in a significant increase in your take-home pay. For example, if you contribute \$100 to your FSA, you will only pay taxes on \$90 of your income. This is a great way to save money on your taxes and get more money in your pocket!

For more information on how to set up and use your FSA, please contact your HR representative or visit our website at [www.rhodeislandhospital.com/fsa](#).
